Education

Purdue University — West Lafayette, IN
Bachelor of Science in Computer Science — *Aug. 2026 – Expected May 2026*

Stuyvesant High School — New York, NY
New York State Advanced Regents & Stuyvesant Endorsed Diploma — *Sep. 2022 – June 2026*

Experience

Regeneron Research — Sep. 2023 – June 2026
Stuyvesant High School — *New York, NY*

- Presented independent research at multiple conferences including Terra Fair NYC and NYC Student Research Conference
- Designed and executed an independent research project with minimal external guidance
- Contacted professionals via cold email as part of research
- Wrote a comprehensive research paper covering methodology and findings
- Submitted paper to Regeneron Science Talent Search 2026 and Terra NYC Fair 2026

Web Developer at My Emollient (small cosmetic business) — July 2025 – Present
Hybrid — *Brooklyn, NY*

- Developed and implemented multiple parts of the business website
- Built and continously maintained an internal tool allowing non-technical staff manage a custom-coded product collection display grid without editing code

Lincoln-Douglas Debate — Sep 2022 – Sep 2023
Stuyvesant High School — *New York, NY*

- member of Stuyvesant High School's Lincoln-Douglas debate team
- Competed on the team in various competitions on the East Coast circuit
- Researched monthly topics to write Affirmative/Negation cases and contributed to team block files
- Analyzed articles to build argument chains and rebuttals

Projects

StuyOverflow | *Python, Flask, React, DigitalOcean, Node.js, OAuth2* — May 2026 – Present

- Developed a full-stack student-focused Q&A web platform to improve on existing classroom forum tools, addressing cluttered UI, confusing post creation, and intimidating class communications
- conducted UI/UX research by A/B testing variants with student testers and adjusted design based on feedback
- Integrated OAuth2 to allow for secure Google sign-in and streamlined account login/creation for students
- maintained structured devlogs, timelines, and design docs for progress tracking and team coordination

2D physics game inspired by Angry Birds | *Processing* — May 2025 – June 2025

- Built a 2D physics-based puzzle game using the Fisica physics engine in Processing, simulating gravity, collisions, and projectile motion
- Implemented slingshot-style launching, destructible obstacles, targets with hit/win conditions on contact
- Learned to apply physics engine concepts (rigid bodies, joints, forces) to game design and mechanics

Technical Skills

Languages: Java, Python, JavaScript, Processing, HTML/CSS, GDscript(beginner), SQL (beginner)
Frameworks: React, Node.js, Flask
Developer Tools: Git, Docker, Google Cloud Platform, VS Code
Libraries: pandas, NumPy, Matplotlib, D3.js
Other Technologies: OAuth2, Digital Ocean, Godot
